Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 10, 2009 has been entered.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: Claims 1-11 are allowed as patentably distinct over the prior art of record. The closest prior art of record is Ogasawara et al. (JP 2003-144990), Krogedal et al. (US 7,429,298), and Baba et al. (JP 06262564).

While Ogasawara et al. (JP'990) disclose a method for coating the surface of an object in a zig-zag path, they do not teach or fairly suggest turning paths for reciprocation, located at a boundary between adjacent coating areas which abut along the said boundary (at which the turning paths are located). Krogedal et al. (US'298) disclose a process whereby each of two robot arms paint one half of an object and do not teach or suggest fairly a pattern of turning paths like a series of steps alone or in combination with the other references. Baba et al. (JP'564) teach a system of painting robots which paint independently, one on each side of a car, where one robot is programmed with a painting path and teaches the second robot to paint the other side in a mirror image of the path painted by the first, but do not teach or suggest fairly turning

paths such that each successive one of the turning paths on the front side of the boundary extends further in a direction opposite to the conveying direction than each previous one of the turning paths alone or in combination with the other references.

Upon further search, no other prior art that anticipates or suggests fairly the instant claims has been located as of the date of this action. Therefore, Claims 1-11 are allowed over the prior art of record.

Examiner's Comments

3. In order to better clarify the record, the examiner wishes to point out that Kenmoku et al. (US PGPUB 2007/0134429) does not raise an issue of double patenting because the claims of Kenmoku are considered to be patentably distinct from the present claims since the present application requires that adjacent coating areas abut along the boundary.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALEXANDER WEDDLE whose telephone number is (571) 270-5346. The examiner can normally be reached on Monday-Thursday, 7:30 AM - 5:00 PM EST.
